

Instructions for Use of WIZARD products

WZ202 GREEN DESCALER

Cleans and radically removes all scale deposits, limescale and dried residues. Complies with the legislation on products that may come into contact with foodstuffs, products and beverages for human consumption.

Leave to soak in a bath composed of up to 10% WZ 202. The descaling time depends on the thickness of the scale. Rinse the parts thoroughly with soapy water. Stabilize with WIZARD WZ402 passivating solution.

WZ203 POWERFUL DESCALER

Attacks all scale and lime residue, verdigris and dried grease. Prevents corrosion and restores shine without mechanical action. Does not attack metals, without action on most plastics and corks. Fast and economical action. Ideal for pistons, rotors, keys, hinges and bows.

Soak in a bath of up to 50% WZ 203. The descaling time depends on the thickness of the scale. WZ 203 revives the copper in the alloy. Rinse the parts thoroughly with soapy water. Stabilize with WIZARD WZ402 passivating solution.

WZ301 ANTI-FIRE GEL

Translucent gel, works as a heat shield that protects all surfaces exposed to the flame of a blowtorch. Protects varnishes against heat during soldering. Does not stain, non-toxic, non-corrosive. Shake well and spray in a thick layer (approx.1 mm) directly on the area to be protected and 5 cm around. Re-apply if necessary during welding. The protection time depends on the power and the duration of heating. After soldering, wipe off the excess gel, preferably rinse with hot water by rubbing with a soft brush. Can be applied with a brush.

WZ205 GEL VARNISH REMOVER

Fast and powerful stripper for mono or two-component paints and varnishes as well as oven-cured powders. Does not attack treated substrates which can be re-varnished after draining and drying. Use pure with a brush. Leave to act then remove with a spatula or brush. Rinse with a pressure jet. Stabilize with WIZARD WZ402 passivating solution. Work in a ventilated room.

WZ204 VARNISH STRIPPER LIQUID

Fast and powerful stripper for mono or two-component paints and varnishes as well as oven-cured powders. Does not attack treated substrates which can be re-varnished after draining and drying. Use pure in bath, brush or spray. Leave to act then remove with a spatula or brush. Rinse with a pressure jet. Stabilize with WIZARD WZ402 passivating solution. Work in a ventilated room.

WZ 306 SPRAY 500ml METAL DEGREASER

Thoroughly removes dust, grease, oils, residues from mechanical parts and polishing paste. Dries very quickly at room temperature (2 times faster than ether).

Hold the aerosol vertically. Spray directly on the surface to be treated from a distance of 5cm to 25cm. Leave to act until complete evaporation. Repeat the operation if necessary. Beware of any splashing by the force of the jet. Wear glasses. Can also be sprayed on a cloth.

WZ206 METAL DEGREASER

Thoroughly removes dust, grease, oils, residues from mechanical parts and polishing paste. Dries very quickly at room temperature (2 times faster than ether).

Use with a cloth, brush or sprayer. Leave to act until complete evaporation. Repeat the operation if necessary.

WZ402 ALKALINE PASSIVE

Passivation with an alkaline solution is an essential step after the treatment of pickling, descaling and more generally to neutralize the acidity. The alkaline passivator protects the brass (zinc) from atmospheric corrosion and delays further scaling.

Use by dipping process in a PVC tub, spraying and by manual application with a brush. The bath should always be clean.

WZ200 SILVER CLEANER

Powerful deoxidizing cleaner for the renovation and shine of silver and gold. Soak the pieces in a bath for a few seconds or spray, rub with a sponge or a brush, rinse with running water, preferably lukewarm. Wipe clean with a soft cloth.

WZ207 ULTRASONIC CLEANING SOLUTION

Chemical degreaser of ferrous and non-ferrous metals for ultrasonic machines. Degreases, deoxides and shines effectively. Superior quality augmented alkaline solution for better results.

In a bath in an ultrasonic cleaner, from 20 to 70 ° C, pure or dilution **1 : 5 (with 5 parts of water)** in the case of greasy or oily surfaces. Use in a well ventilated area. Wash hands after handling.

WZ501 SUPER CLEANER ALL METALS

Creamy cleaning paste for light metals (copper, brass, silver, gold, aluminium), deep cleans, removes scratches and restores shine while providing protection against soiling.

Apply a small amount of Wiznet to a damp sponge, rub the surface, rinse with water and polish with a dry cloth. Can also be applied with a polisher, steel wool or by dipping a strip of abrasive cloth.
